

COMPANY PROFILE

BONOMI INDUSTRIES SRL

Global presence, family spirit

Bonomi Industries Srl is a leading manufacturer of high-quality **brass ball valves and fluid control systems**, combining precision engineering with decades of expertise.

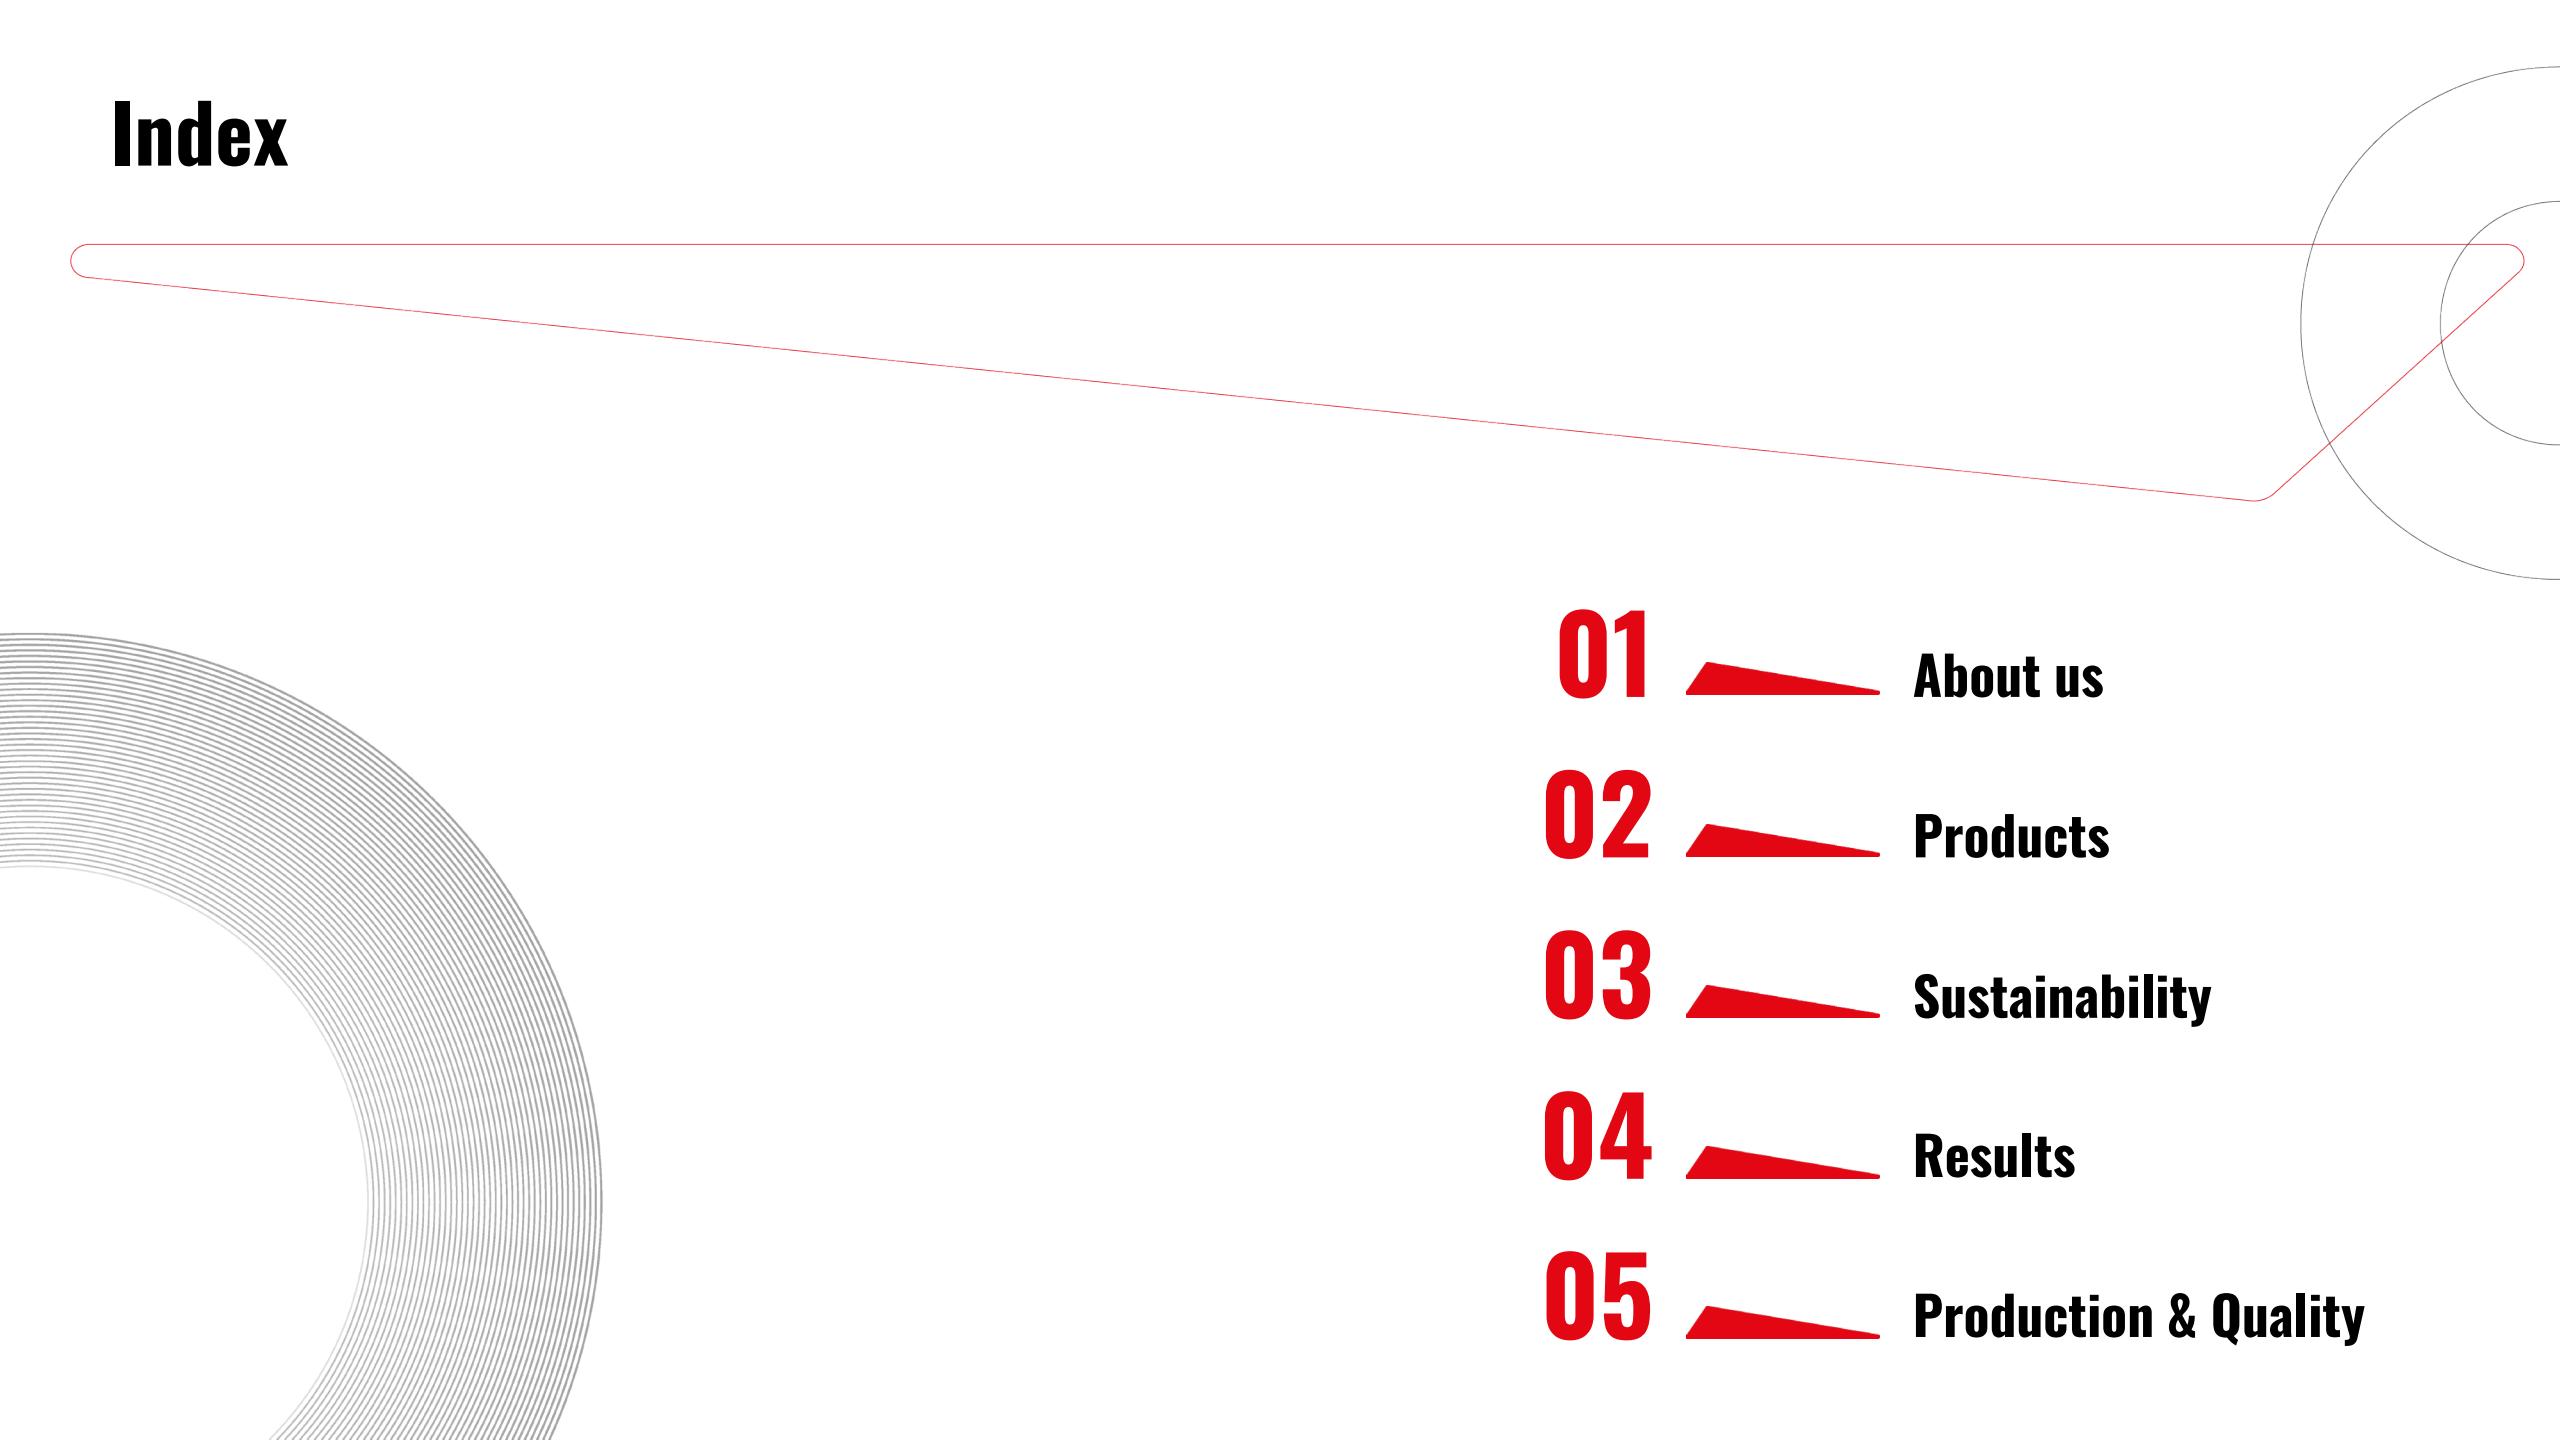

Rooted in tradition and driven by innovation, we respond to the evolving needs of a global market with agility and vision.

Sustainability is at the heart of our approach—reflected in responsible production practices and our ongoing commitment to green, forward-thinking solutions.

More than just technical excellence, Bonomi Industries Srl represents **strong relationships and lasting trust**, built over 70 years of steady growth and shared success.

About us

ABOUT US 01

Bonomi Industries Srl

We are a **family-owned** Italian company with a strong international focus. We design and manufacture high-performance brass valves and actuators, installed on five continents in both industrial and residential applications.

We work with leading OEMs and global distributors, offering a **wide range of standard products and custom solutions**, backed by qualified technical support and attentive, customer-oriented service.

With in-depth knowledge of local regulations and market dynamics—and through our **branches** in North America and Japan—we ensure direct presence, operational continuity, and efficiency in the most strategic markets for our customers.

ABOUT US 01

organization

A global brand

RuB is an established brand of brass valves, actuators, and OEM solutions, recognized worldwide for reliable performance across a wide range of applications.

Products are 100% engineered and manufactured in Italy through an integrated process that includes in-house design, machining, assembly, and testing.

Certified materials, tight tolerances, and continuous quality control uphold RuB's reputation for technical excellence and long-term reliability.

With over 70 years of experience in the industry, RuB supports professionals globally with innovative solutions, compliance with the latest standards, and specialized technical consulting to meet evolving needs.

ABOUT US 01

organization

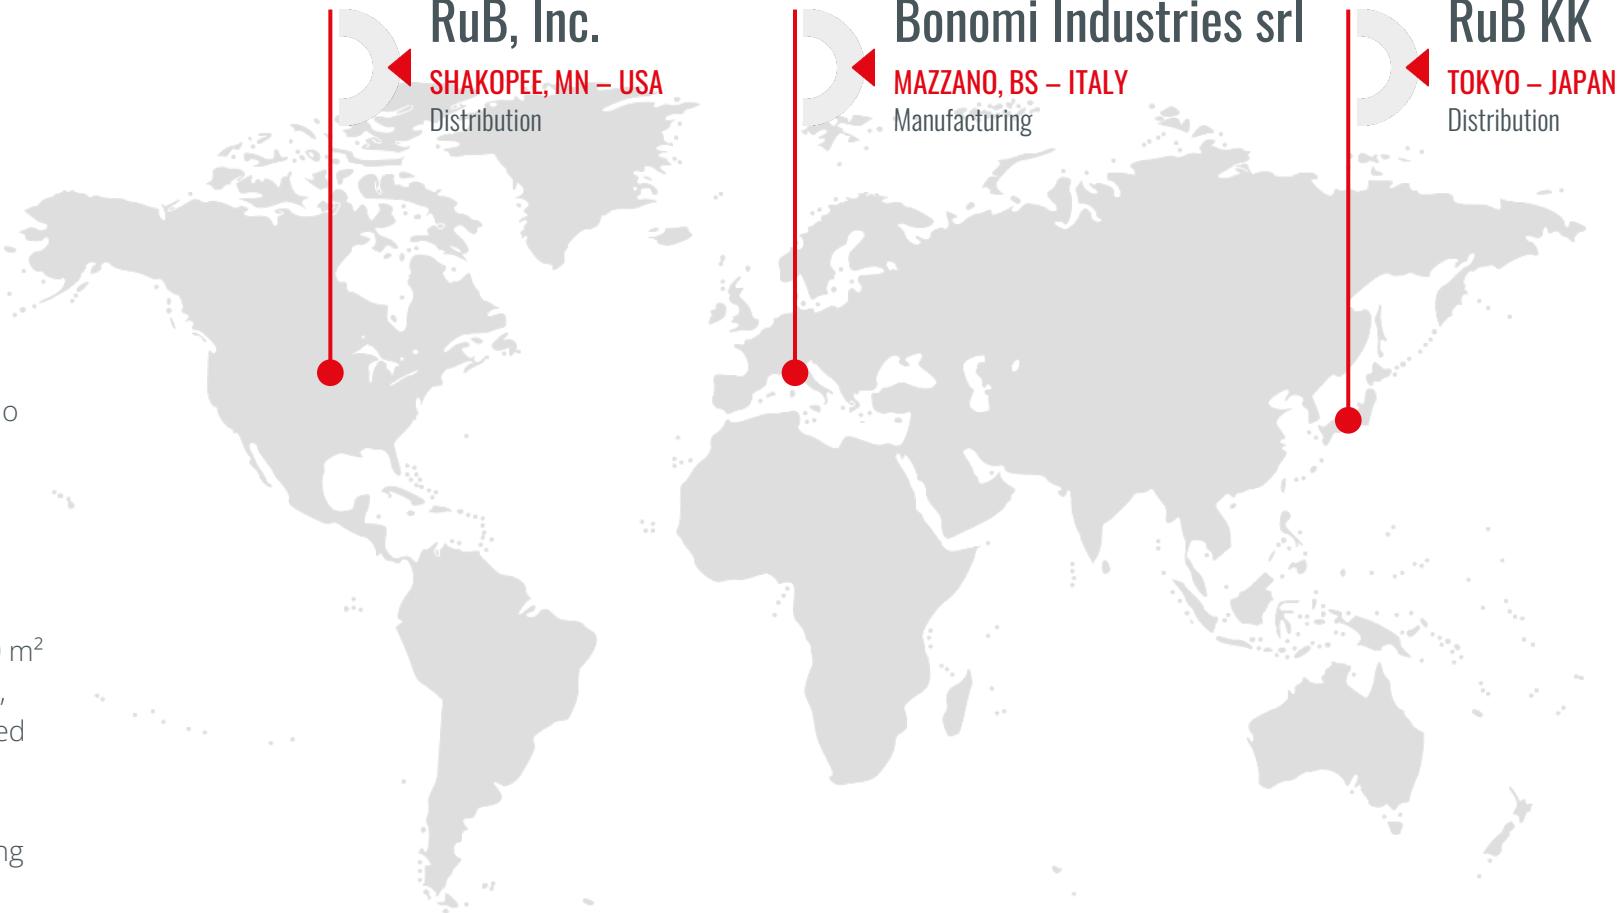

Companies in the world

Production takes place at Bonomi Industries Srl in Mazzano (Brescia, Italy), where RuB valves and actuators are engineered and manufactured. Finished products are distributed globally from Italy and through dedicated international branches.

In North America, RuB, Inc. operates from a modern 5,000 m² facility, managing both assembly and distribution. In Japan, RuB KK serves as a strategic presence in a highly specialized market.

All companies are part of Hadron, a privately owned holding company founded in 2018 to guide strategic direction and coordinate shared services.

The Group is led by the **Bonomi family**, who uphold a long-standing commitment to quality, customer focus, and sustainable development.

ABOUT US 01

people

Our greatest asset

Expert teams in engineering, sales, and operations contribute every day to delivering high-performance, reliable solutions tailored to customer needs.

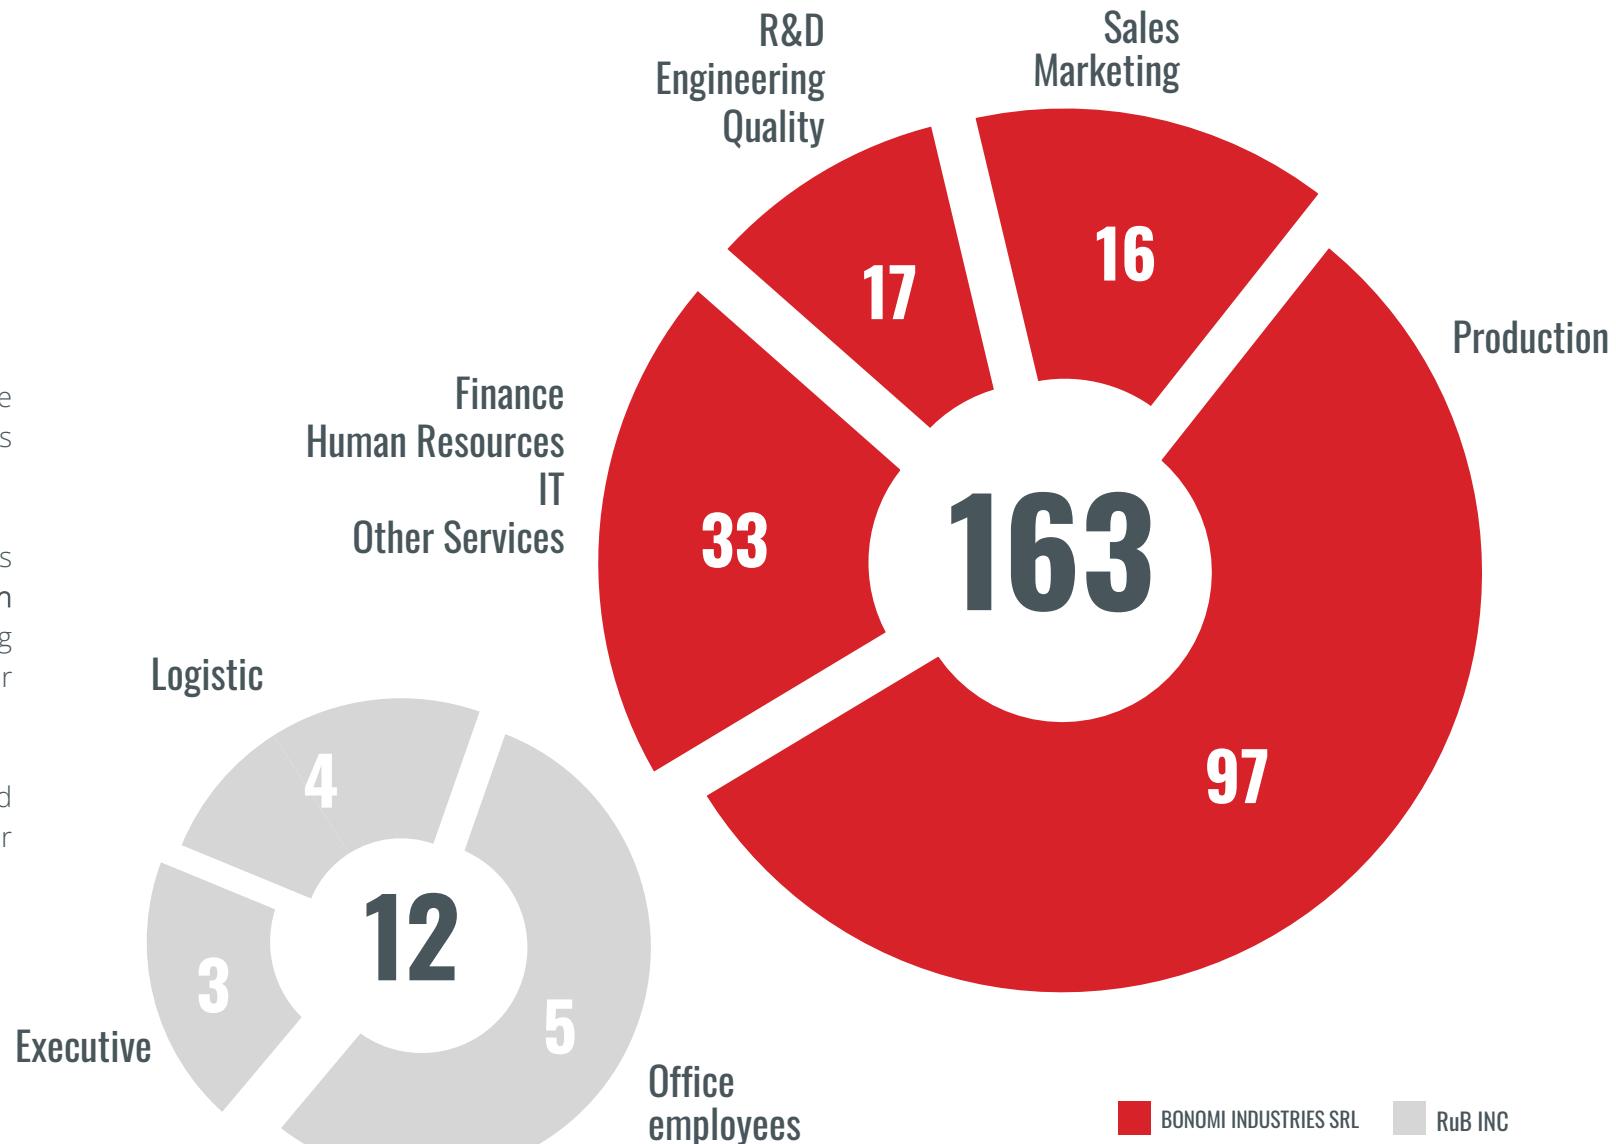

Each department brings strong technical expertise, continuous training, and a shared passion for quality. A Lean approach guides the way we work—eliminating waste, improving efficiency, and focusing on what truly creates value for our customers.

We believe the best solutions come from simple, practical, and shared ideas. It's the talent, flexibility, and dedication of our people that turn challenges into reliable, long-lasting results.

BONOMI INDUSTRIES SRL

RuB INC

ABOUT US 01

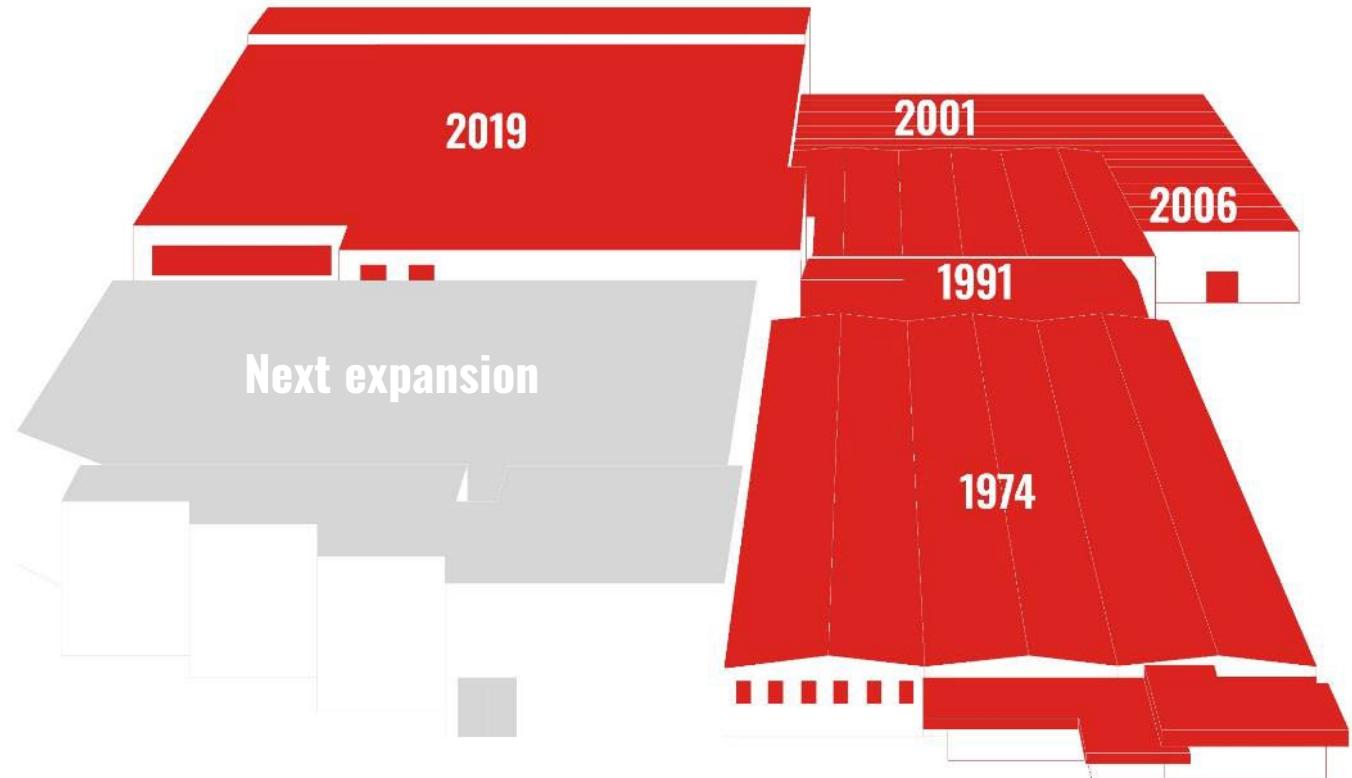

manufacturing site

Ongoing expansion

Our production site in **Mazzano (Brescia)** is the core of our operations.

From the original 5,000 m² facility in 1974, the plant has expanded to 20,000 m² of covered space, driven by continuous investment in efficiency and innovation.

The **ongoing expansion** reinforces our commitment to increasingly advanced, sustainable manufacturing aligned with the needs of the global market.

02

Products

PRODUCTS 02

RuB product range

A wide and modern range

RuB delivers solutions for every fluid control challenge. Products are engineered for zero downtime, helping customers and distributors avoid financial and reputational risks.

Challenges are addressed through flawless product quality, timely deliveries, and an ideal quality/price ratio—with solutions that safeguard People and the Planet and ensure long-lasting performance.

To meet specific application and regulatory requirements, the RuB product range includes components in traditional brass, low-lead brass, lead-free brass, aluminum, and dezincification-resistant brass.

VALVES

RuB ranges from micro and mini valves, 2-way and 3-way valves, both manual and actuated, made in a multitude of brass alloys and aluminium, all the way up to 4".

ACTUATORS

RuB electric and pneumatic actuators, developed through in-house R&D, ensure consistent operations, which are crucial for maintaining quality and sustainability standards across various sectors.

OEM

With over 70 years of experience in custom solutions, the Engineering Center supports manufacturers worldwide by solving unique challenges with fast inception-to-delivery timeline and lifetime quality precision.

PRIVATE LABEL

We offer full private label capabilities, customizing RuB ball valves to meet our customers' branding and technical requirements.

PRODUCTS 02

RuB valves

Key features and options

- Full range of valves
- Full, nominal and reduced port
- Wide selection of threads and connections according to international standards
- Different control knobs available
- Various alloys available
- Customized solutions
- Silicone-free
- Product traceability
- Lifetime warranty
- 100% Made in Italy
- H₂ Ready

WHY CHOOSE RuB VALVES

Every detail is designed for safety, reliability, and long-term performance. From advanced materials and smart design features to lifetime guarantees and patented technologies, our ball valves are built to deliver more — in every application.

APPLICATIONS

Companies worldwide trust RuB solutions across a wide range of applications. Each application presents unique technical challenges, from high pressure to specific certifications, helping customers identify the most suitable solutions for reliable, safe, and efficient performance.

PRODUCTS

02 Why choose RuB valves

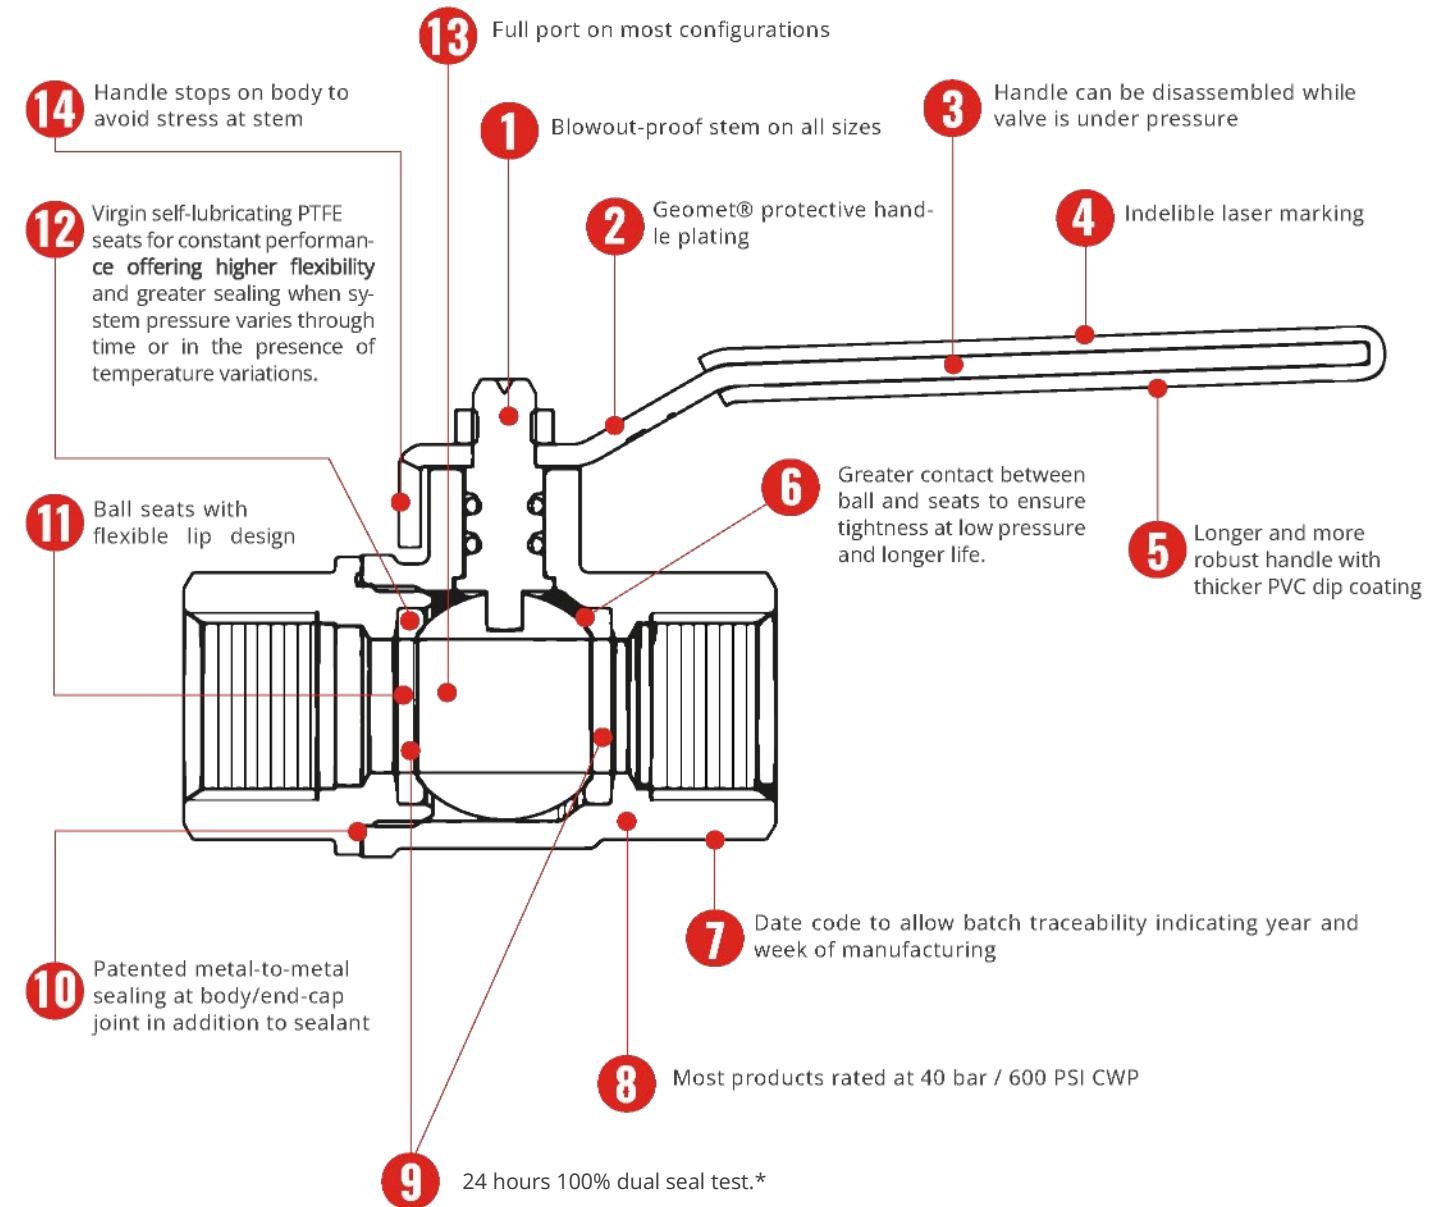

How does RuB seal test work?

Valve in half open position is pressurized at 6 bar (87 psig), then closed, trapping compressed air in between ball seats and stem sealing.

After adequate preset time, based upon valve size, any leaks are verified using extremely accurate electronic sensors and any defective valve is automatically rejected.

All valves passing this initial seal test are filled with compressed air again and remain closed and under pressure for minimum 24 hours.

After 24 hours, the valves go back again under a new set of electronic pressure sensors – with same accuracy – and any leaking valve is automatically rejected.

* Certain products are not suitable for double seal test

PRODUCTS 02

electric actuators

CP

[Download datasheet](#)

The CP series Electric actuator provide an output torque to suit up to 1" valves, and it is available in AC and DC voltage.

Compact package to fit in restricted spaces.

The CP series has an ISO 5211 mounting interface for direct assembly.

- **Voltage range:**
 - 220-240V AC 50/60Hz
 - 110-120V AC 50/60Hz;
 - 24V AC 50-60Hz;
 - 24V DC / AC 50-60Hz; (UL certified)
 - 3.5-12 V DC; 12 V DC; 24V DC;
- **Motor power consumption only during operation:**
 - DC and DC/AC: 5.5W;
 - AC: 8W
- **2P or 3P controlling**
- Over 100.000 cycle life tests made
- IP 65 – Nema 4x
- Visual position indicator
- Micro limit-switches and feedback signal

PRODUCTS 02

electric actuators

CT
8 to 40 Nm

[Download datasheet](#)

The CT electric actuators are designed to drive ball and butterfly valves with ISO5211 mounting pad, providing a quarter turn motion.

In combination with RuB valves are used in wastewater treatment plants, power plants, refineries, mining processes, food factories and in the fluid automated control in HVAC.

- Compact package with perfect shaft alignment
- Direct Mounting ISO 5211
- Voltage range: (24v – 48v – 110v – 230v - 50/60hz – Vac/Vdc)
- Visual position indicator & manual-override
- IP 54 (CT1) and IP 67 (CT2-3-4)
- Limit Switches and feedback signal
- 2P or 3P or Modulating controlling
- Option: ModBus;
 - fast version (1" or 4");
 - internal heater (anti-condenser);
 - fail mode (super capacitors).

PRODUCTS 02

electric actuators

CH

50 to 400 Nm

[Download datasheet](#)

The CH valve actuators are used on ball or butterfly valves.

As standard, this actuator offers an IP67 ABS housing, dome position indicator, end of travel limit switches, manual override and an internal heater.

The new Series offers **multi-voltage capability** and failsafe functionality utilizing a super-capacitor back-up system.

- Direct Mounting ISO 5211
- **Voltage range:** 24 V AC / V DC – 95-265 V AC
- Dome position indicator
- Limit switches
- Manual override IP67 (fully weatherproof)
- 2P or 3P or Modulating controlling
- Options: Fail mode (Supercapacitors)

PRODUCTS 02

pneumatic actuators

EA

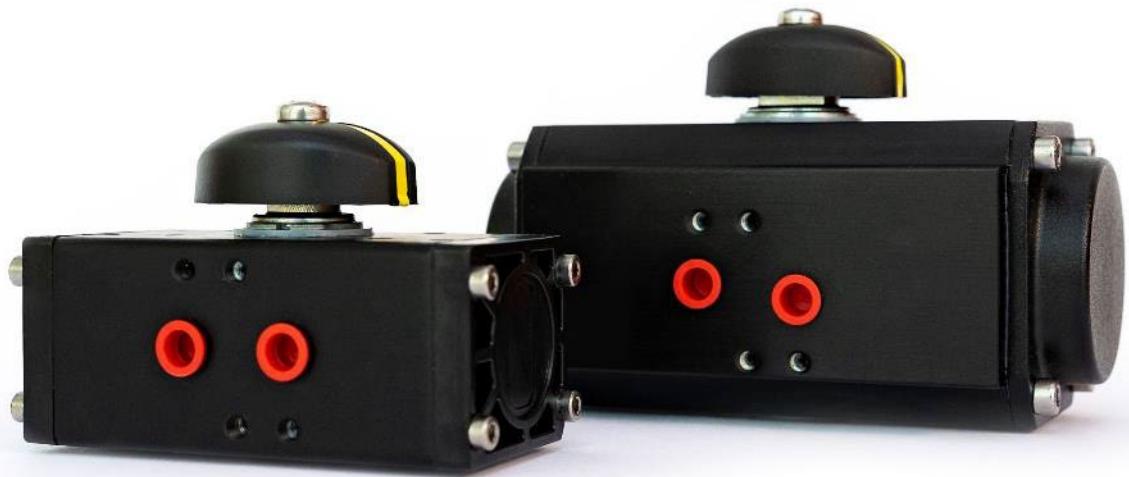

[Download datasheet](#)

The EA actuators series is designed for quarter turn applications on RuB ball valves in a compact and lightweight design.

They can be supplied **single (spring return)** or **double acting** with a wide range of output torques offering a complete valve automation solution.

EA actuator has a **patented guide bar** which keeps the rack and pinion gear teeth in perfect engagement in all directions of operations. The contact between the teeth is pure rolling contact – no rubbing or friction which means minimum wear and long cycle life.

- Aluminium Body/Pistons
- Rack and pinion mechanism: compact design
- ISO 5211 and Namur Interface: easy-to-install and fast-to-install
- Springs kits: versatile and easy to adjust spring torques
- Long lifetime
- Low maintenance cost
- Heavy-duty cycles

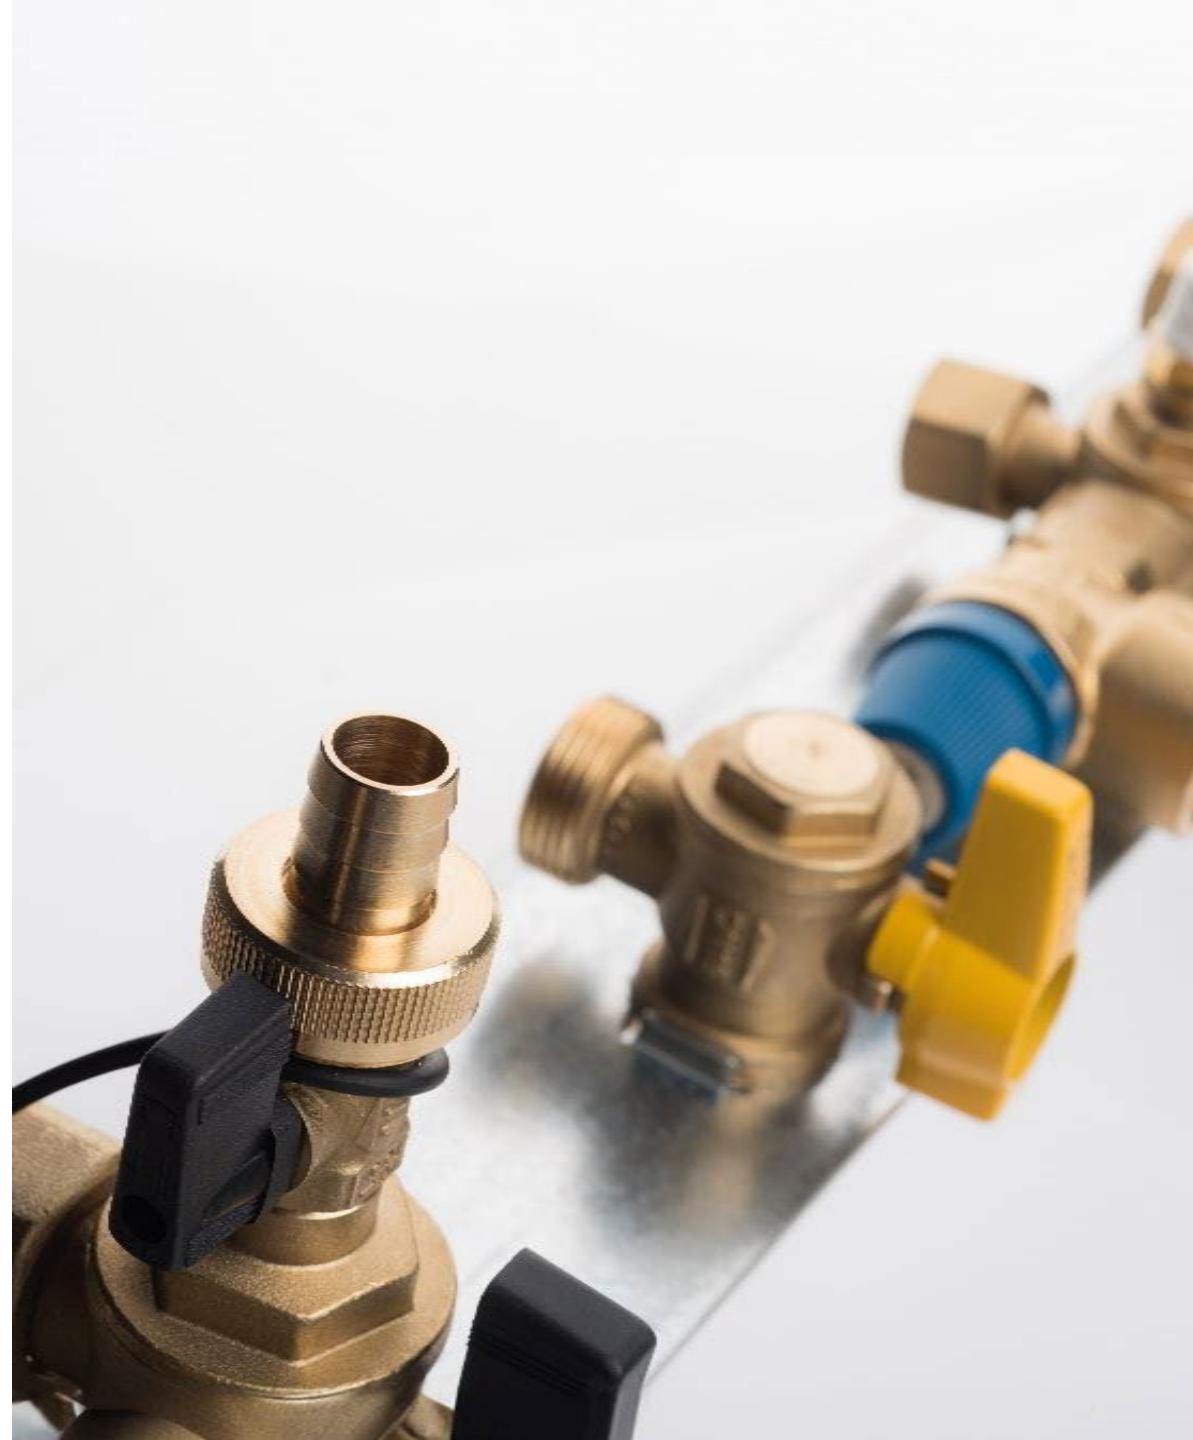

PRODUCTS 02

OEM

Every year, **OEMs** all over the world rely on RuB custom solutions to reduce leaks, equipment breakages and production downtime. We're heavily invested in **OEM** customizations with **custom-made machinery** for innovative products and solutions.

We have proven expertise in solving technical and operational challenges for leading **boilers**, **heat pumps** and **burners** manufacturers, **LPG** gas tank and system manufacturers, manufacturers of **watering systems**, **fire protection**, **refrigeration**, **HVAC** manufacturers, marine applications with shipbuilders, compressors, tanks, machine tools manufacturers, **filtration**, **chemical**, **food processing** and **pharmaceutical** companies.

We are intrigued to learn about your obstacles and bring your custom, top shelf solution to life.

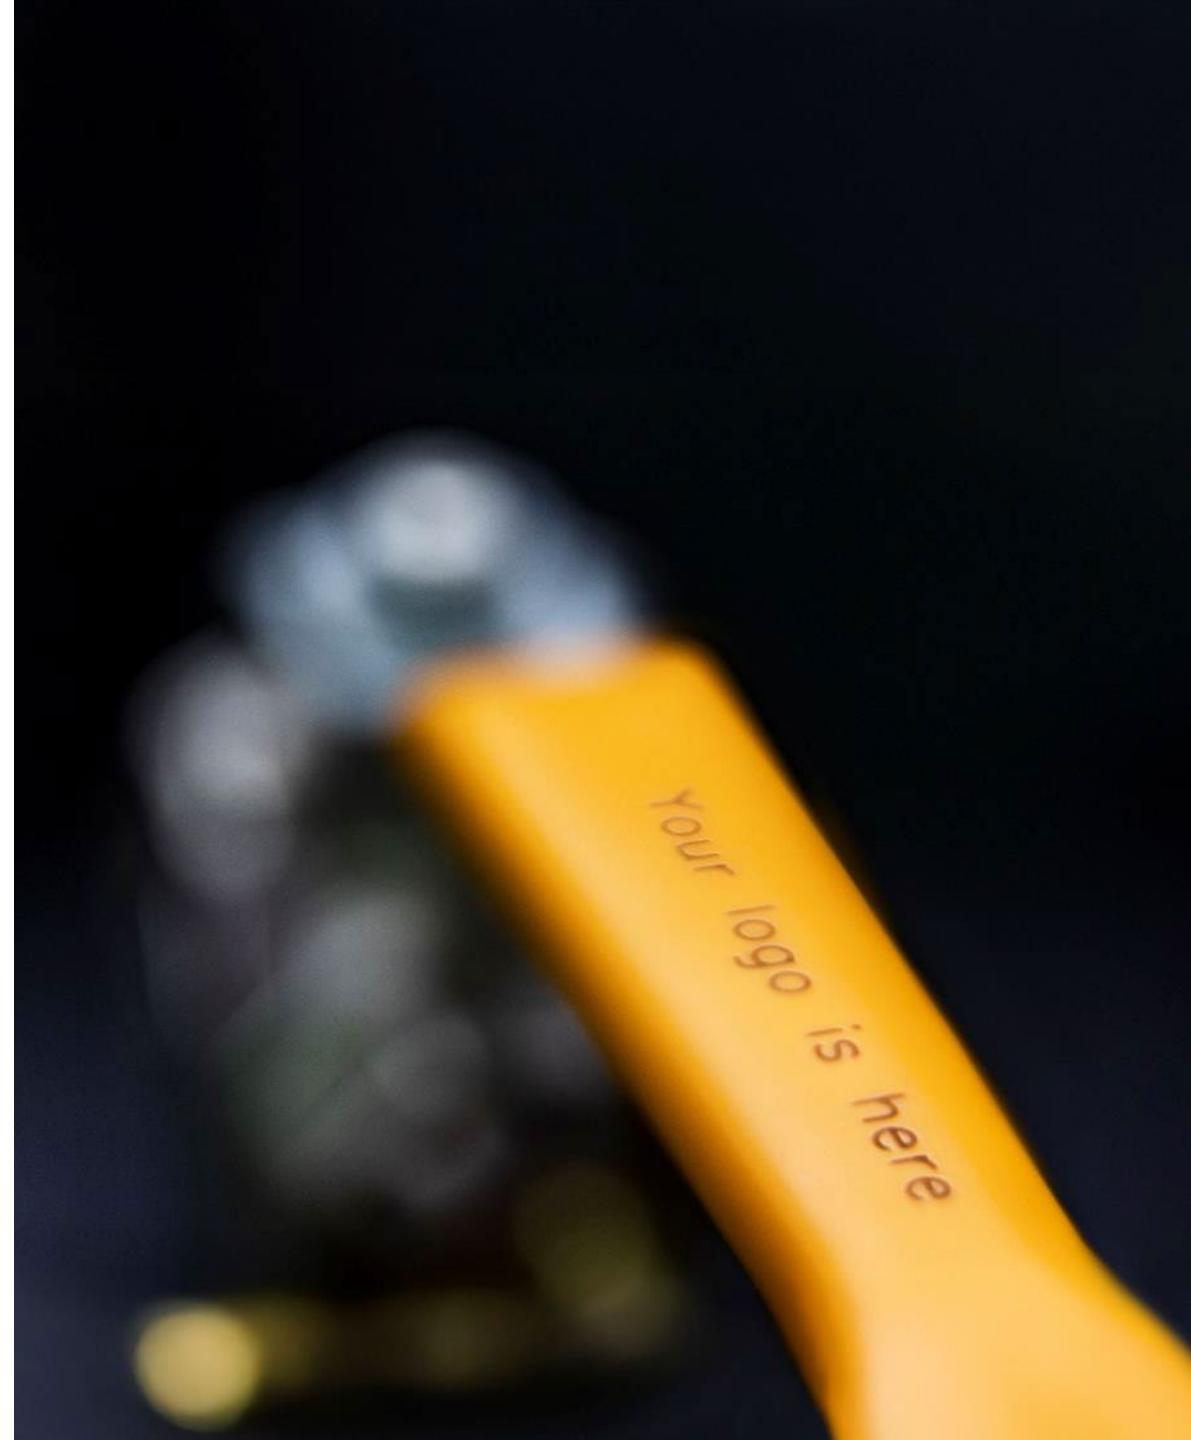

PRODUCTS 02

private label

We strive to meet the needs of our customers in every way possible. And we do so not only through specifically designed, engineered and manufactured **OEM products**, but also by customizing standard **RuB** ball valves.

The possible branding options to choose from include:

- Changing the **lever marking** to the customer's trademark
- **Packing** with a custom label
- Customized **handle colors** and materials
- Customized **valve fittings**
- Dedicated **valve body stamping**
- Special marking on the valve body
- Custom installation instructions

03

Sustainability

SUSTAINABILITY 03

How we walk the talk

- RuB products are designed to minimize waste thanks to long-lasting performance.
- 100% of brass ball valves are **silicon-free** for highest recyclability.
- Brass scrap is recovered by partner extrusion mills and reused as raw material.
- 100% of cooling waters are recovered and reused within the production process.
- Ongoing **investments in renewable energy and advanced technologies** aim to reduce environmental impact, improve energy efficiency, and support sustainable production model.

SUSTAINABILITY 03

treedom

Bonomi Industries Srl forest

As part of its efforts to offset CO₂ emissions, Bonomi Industries has launched a **tree-planting initiative**.

In partnership with Treedom®, an Italian organization that promotes reforestation projects worldwide, the company is **planting 1,000 fruit trees over five years**.

«Bonomi Industries Srl Forest» is a project that began in 2022 with the planting of the first 200 trees in Kenya, dedicated to all employees.

It is expected to **absorb 57.5 tonnes of CO₂** over ten years and contribute to the economic and social development of local communities.

Trees make
a **difference**

SUSTAINABILITY 03

ISO 14001:2018

Certified Management System

ISO 14001 is an international standard that defines the requirements for an effective environmental management system.

Bonomi Industries has adopted this standard to continuously improve its environmental performance, reduce the impact of its production activities, and ensure compliance with applicable regulations.

The adoption of ISO 14001 reflects a strong commitment to sustainability, pollution prevention, and environmental responsibility.

Through a systematic approach, the company monitors and manages its processes with a green perspective, engaging employees and stakeholders to help build a more sustainable future.

SUSTAINABILITY 03

ecovadis

Silver rating

Since 2022, Bonomi Industries has been assessed by EcoVadis, a globally recognized platform for evaluating sustainability performance.

The methodology covers four key areas: environment, labor practices and human rights, ethics, and sustainable procurement.

In 2024, the company maintained its **Silver Medal** and improved its overall score, reaching the 87th percentile. This result places Bonomi Industries among the **top 15% of companies** evaluated by EcoVadis, reflecting ongoing progress in sustainability and corporate responsibility.

SUSTAINABILITY 03

sustainability report

Voluntary ESG reporting

In 2024, Bonomi Industries published its first Sustainability Report, reflecting the company's commitment to **integrating ESG principles** in a concrete and cross-functional way across all operations.

Although not yet mandatory, this path was undertaken voluntarily to **transparently** assess the company's impact and lay the foundation for increasingly responsible growth.

A first step that sets a clear direction and opens an ongoing dialogue with **all stakeholders**: customers, suppliers, employees, communities, and institutions.

Results

RESULTS 04

Over the years, the Group has evolved from a local manufacturer into a global player in the valve and actuator industry.

This journey has been marked by constant innovation, strategic growth, and a deep commitment to quality and customer satisfaction.

Today, performance is not measured by numbers alone, but by the value created across all dimensions of our business.

Economic resilience, social responsibility, and environmental care are the three pillars that guide our actions and define our long-term vision.

ECONOMIC PERFORMANCE

SOCIAL PERFORMANCE

ENVIRONMENTAL PERFORMANCE

RESULTS 04

economic performance

Strategic value creation

Despite a challenging global context, the Group invested in **advanced production systems** and remained committed to **sustainable growth**.

- €42.2 million in economic value generated in 2024 (-26.6% vs. 2023).
- Operational costs down -28.7% thanks to lean inventory and new high-precision machines.
- €4.6 million invested in certified, digitally integrated equipment.
- Continued support for education, local projects, and social initiatives.

The Group considers **value creation** not just as financial performance, but as a shared responsibility—enriching employees, communities, and the national economy.

Carbon footprint

In 2024, Bonomi Industries Srl and RuB Inc. reduced their total CO₂e emissions to 1,239 tons, achieving a **16% decrease** compared to 2023.

92% of these emissions (Scope 2) were related to electricity consumption, down 16% thanks to the adoption of smart, energy-efficient technologies and **increased self-generation through solar panels (+105% vs. 2023)**.

Scope 1 emissions dropped by 14%, reflecting **lower natural gas usage** due to improved insulation and optimized heating systems.

The company also reduced raw material usage by 32% and prioritized local, ESG-aligned suppliers—98% of raw materials were sourced within 50 km of the production site.

Production & Quality

PRODUCTION & QUALITY 05

Quality control

From rigorous incoming goods inspections to double leak testing, **24-72 hours valve assessments**, and visual inspections for top markets/applications, Bonomi Industries Srl ensures consistent reliability and precision in every product.

Advanced traceability systems, calibrated instruments, and statistical **software** enhance quality control throughout the production process.

Our dedicated **Quality Control team** supports continuous monitoring and improvement, ensuring that each production batch meets exactly applicable standards. Paired with robust testing protocols and expert technical support, we deliver solutions designed to meet the most challenging applications.

PRODUCTION & QUALITY 05

Certifications

We are very proud of our 100% made in Italy shut-off brass valves, actuation and OEM engineered product manufactured in our ISO 9001:2015, ISO 45001:2018 and ISO 14001:2018 certified Corporate Headquarters in Brescia, Italy.

We implemented this rigorous quality management and assurance system since 1995 monitored by Lloyd's Register, helping us improve quality and reliability.

Besides Lloyd's and PED compliance, we offer a verified package of quality assurance based on testing services, state of art technology and approvals released by main laboratories and quality agencies from all over the world.

◀ PRODUCTION & QUALITY 05

our volumes

over 3,000 Finished products

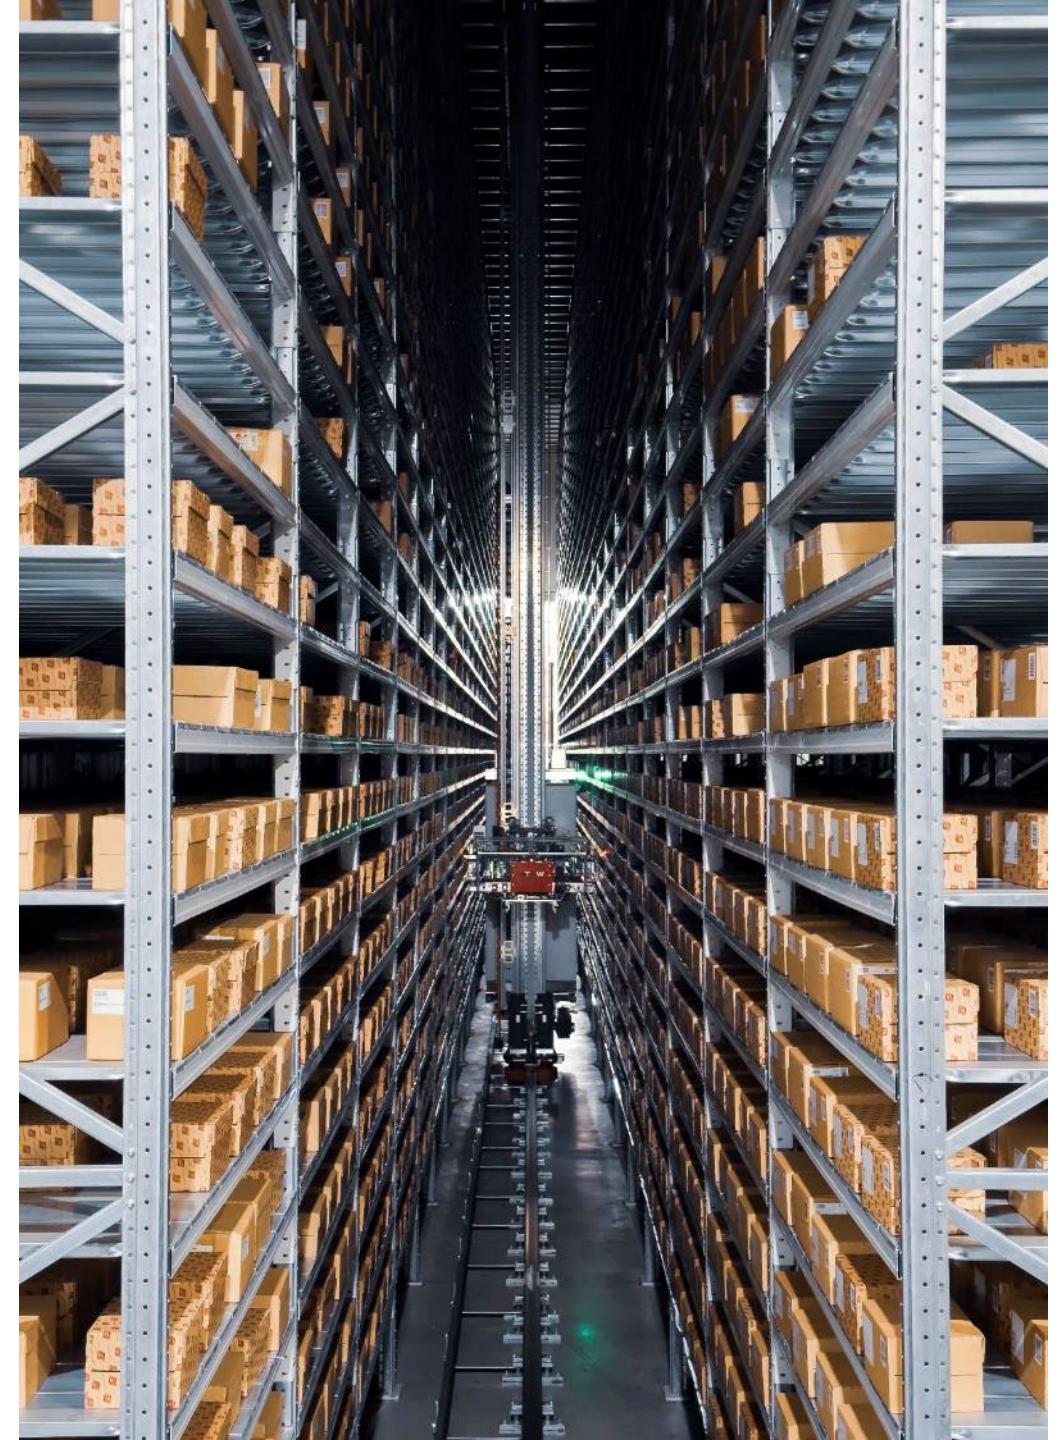

8 mln Brass valves produced per year

7,300 Pallets filled

over 7,000 Different components

270,000 Components produced per day

over 60 mln Components produced per year

PRODUCTION & QUALITY

05

our tests

Automatic testing throughout the whole process

100% seal test on each valve; most valves are tested twice*
(see on the specific data sheet)

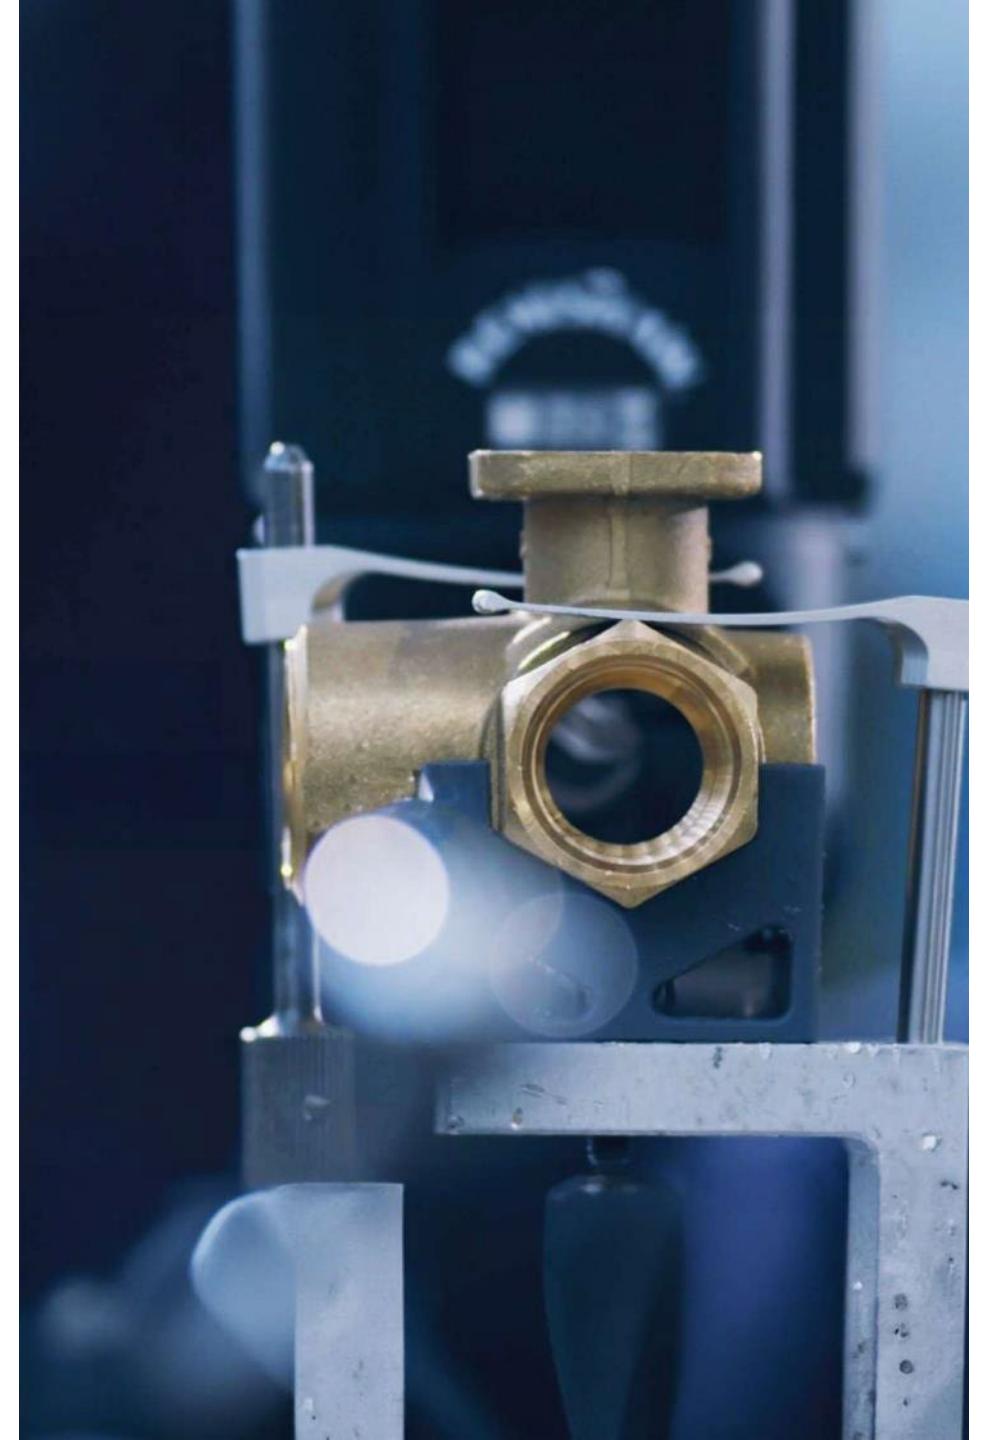

Statistical in-line inspections of all components

Tests performed every day in production

Cycles zero-leakage life-test, along with four times burst-test,
are part of our validation program

*Twice tested (up 2"): S90, S24, S242, S292, S33, S42, S60, S63, S84, S85, S88, S92, S95

PRODUCTION & QUALITY 05

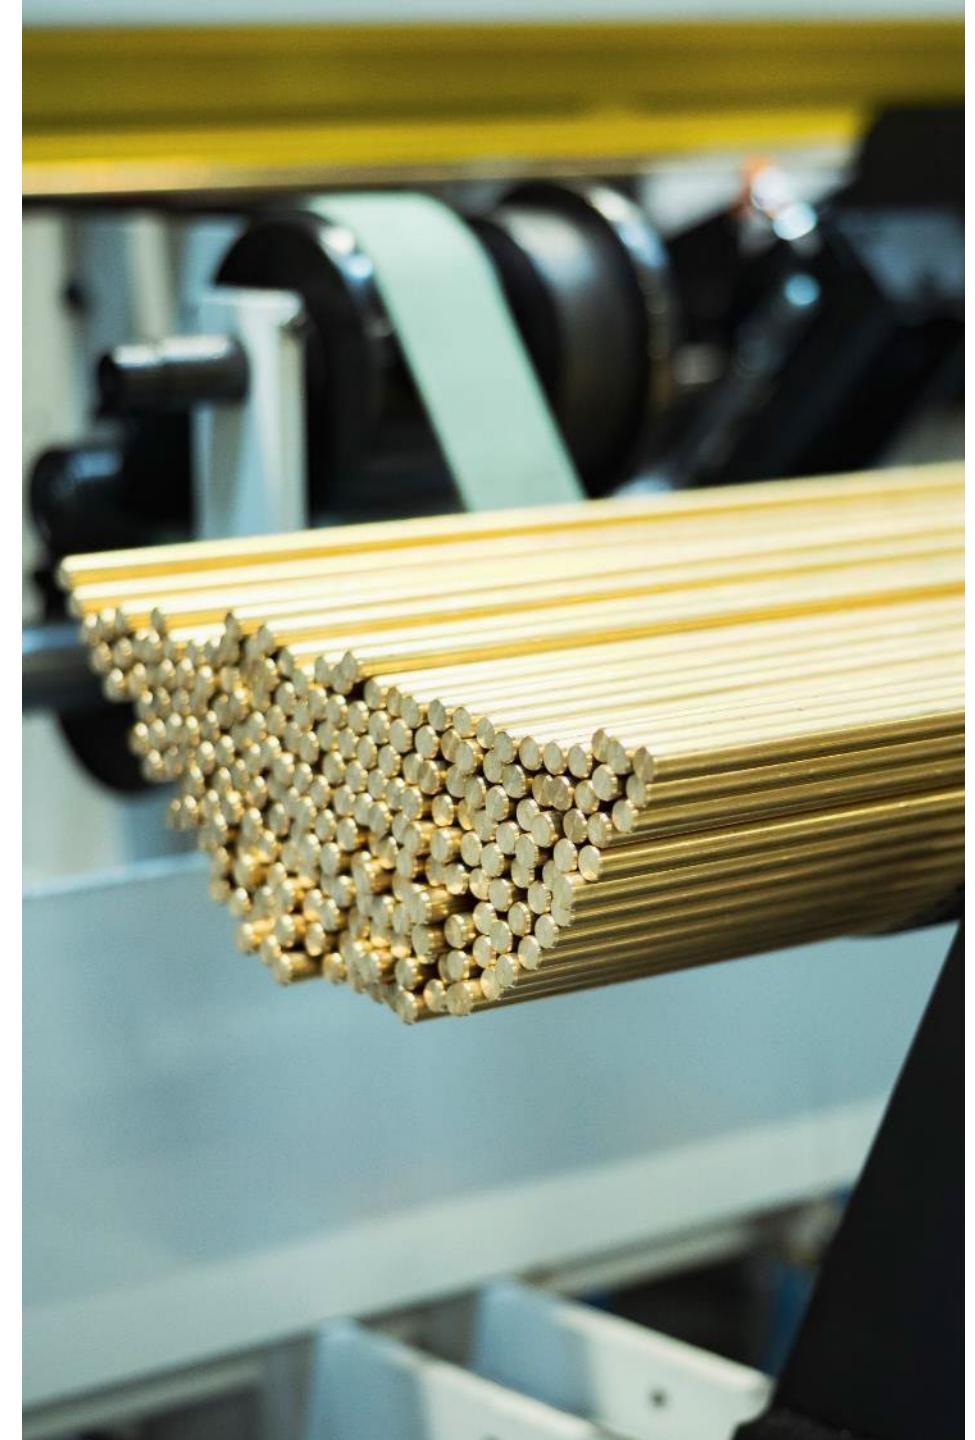

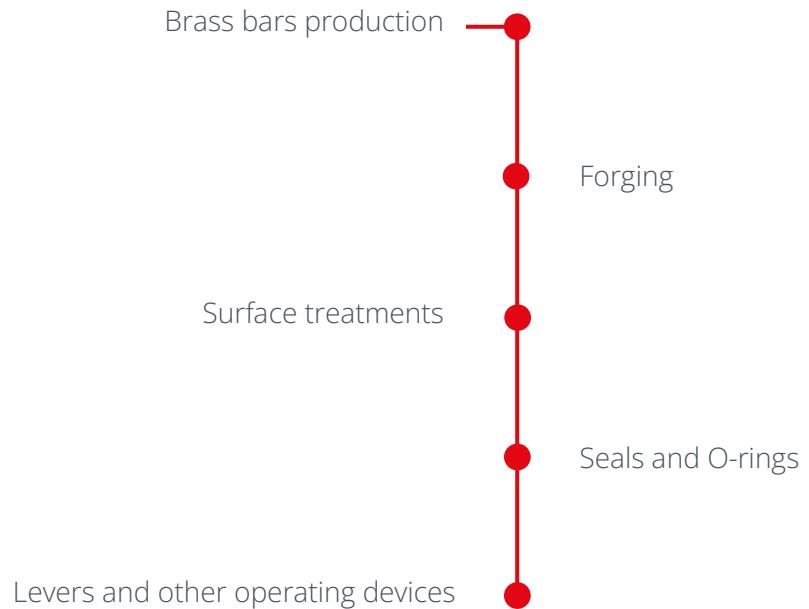

internal processes

- Transfer machines, specifically designed for forgings from 1/8" to 4" size
- Multi spindle bar cutting machines
- Custom-made valve balls cutting and polishing machines
- Automatic assembly machines 1/8" through 4"
- In-house tool production
- Packaging line
- CNC lathes and drilling machines
- Transfer machines for bars
- Flexible assembly and testing lines
- Automatic and self-calibrating in-line testing equipment
- Wireless integrated system for management of goods storage, batch traceability, realtime up-to-date information on parts inventory

PRODUCTION & QUALITY

our capabilities

05

Production

Inline, self-calibrating tests

Logistic

Use of bar code through-out all stages of production and multiple quantity verifications

Alloys

Traditional brass, low lead brass, leadfree brass, aluminum, dezincification-resistant brass

Subcontract

Steel plates, plating, forging, plastics, elastomers, all sourced locally

FMEA

Available upon request PPAP

Dimensions

5.5 mm thru 100 mm

Seal test

Air test by automated equipment, 100% automated air-leak test

Assembly

100% in-line inspection of all components
